

**STRATFORD ARMY ENGINE PLANT
STRATFORD, CONNECTICUT
BASE REALIGNMENT AND CLOSURE**

ADMINISTRATIVE RECORD INTRODUCTION

The documents contained in this administrative record (AR) were used to identify appropriate remedial activities for use at the Stratford Army Engine Plant Base Realignment and Closure (BRAC) property. The AR reflects documents considered or relied upon in selecting the response actions for contamination identified at the property. The AR also serves as a vehicle for public participation in selecting the response actions. Documents reflecting this involvement are included in the AR.

The AR index is a subset of the permanent record and is sorted by filename. The filename is an alpha-numeric identification code unique to each document and is located on the first page of the document in the lower right-hand corner.

A review of the AR for information protected by privilege, Privacy Act, or personally identifiable information was completed and applicable redactions were applied to the electronic images.

Questions or requests for further information should be directed to the Stratford Army Engine Plant BRAC Program Manager, Thomas Lineer.
