RE: AVCO Lycoming Division
Ground-Water Monitoring Program

Dear Mr. Giroux:

In an attempt to maintain a continuous and cost-effective ground-water monitoring program at AVCO Lycoming Division in Stratford, Connecticut, I phoned your office on August 29, 1984 requesting final authorization from Mr. Stark to proceed with the second-year program in accordance with your correspondence dated May 22, 1984 addressed to AVCO's Mr. Ilijich. Since Mr. Stark was unavailable I briefly reviewed the program to date with you noting the past modifications and mentioned the recent EPA-RCRA inspection. In response you stated that the program should continue in accordance with the May 22, 1984 correspondence.

Prior to the initiation of this program please consider deleting cadmium, mercury and amenable cyanide from the parameter list. These compounds have not been detected at or above the laboratory detection limit during the last four quarters of laboratory analyses.

On behalf of AVCO we will initiate the second-year program with your written final approval to proceed. Please complete the form below and forward the entire document (copy) to me in the enclosed self-addressed envelope.

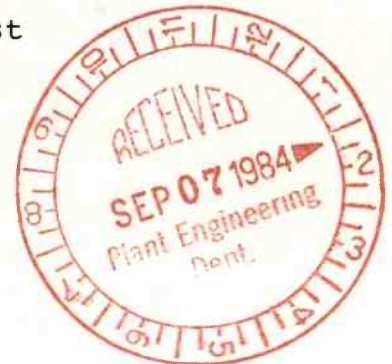

Please contact me if you have any questions.

Very truly yours,

LEGGETTE, BRASHEARS & GRAHAM, INC.

DEP Authorization-to-Proceed

Based on our review of the first-year annual report and other pertinent ground-water monitoring data for the AVCO Lycoming Division Stratford, Connecticut, I give final authorization to proceed with the second-year ground-water monitoring program as stated in my May 22, 1984 correspondence to Mr. Ilijich.
