

November 6, 1985

Mr. Richard Boynton  
Chief of CT/RI Waste Program Section  
USEPA Region I  
HSC-CAUS  
JFK Federal Building  
Boston, MA 02203

Dear Mr. Boynton:

Enclosed please find the RCRA Part B Permit Application and Closure Plan for the Avco Lycoming Textron, Stratford Army Engine Plant, in Stratford, Connecticut.

The RCRA Part B Permit Application is being submitted in compliance with those requirements in Section 213 of "The Hazardous and Solid Waste Amendments of 1984". The enclosed information addresses the operation of our four (4) hazardous waste storage surface impoundments at the above mentioned facility.

Please note that the facility Closure Plan is being submitted under separate cover. Avco Lycoming Textron plans on closing the four hazardous waste surface impoundments in May 1986, therefore, the Closure Plan should be reviewed with this date in mind.

The amended RCRA Part A Permit Application will be submitted because some of the operations that were listed in the Part A as being hazardous waste treatment or storage activities are no longer defined under RCRA or the Connecticut DEP as being hazardous waste treatment or storage activities. In addition, other minor changes will be incorporated into the amended Part A.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on

my inquiry of the persons who manage the system, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

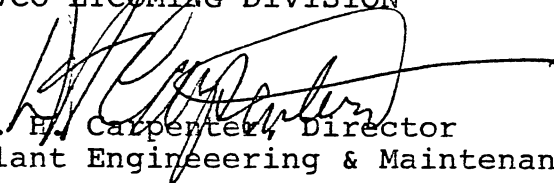

The following certification is made in compliance with Federal Register of 25 September 1985 on Page 38949:

I, David H. Carpenter, am the Owner/Operator of Avco Lycoming Textron, Stratford Army Engine Plant, CTD 001181502, located at Stratford, Connecticut. I certify that the equalization lagoon and sludge storage lagoons at this facility are in compliance with all applicable groundwater monitoring requirements in 40CFR Part 265 Sub Part F.

This facility does not need to comply with 40CFR Sub Part H as noted in 40CFR Part 265.140(c) because the facility is government owned.

Very truly yours,

AVCO-LYCOMING DIVISION

  
D. H. Carpenter, Director  
Plant Engineering & Maintenance
