RE: Technical Comments on Supplementary Hydrogeologic Investigation Report

Dear Mr. Fracasso:

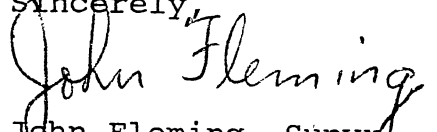

Herewith is Textron's response to your review, which is submitted as a Supplementary Hydrogeologic Investigation Addendum.

The submittal addresses the technical comments in your letter dated April 13, 1992 wherein you had questions after having reviewed the Textron submittal referenced. The response is in the form of a report submitted by C.A. Rich Consultants, Inc. responding to each comment and suggesting collection of additional data during the third quarter monitoring at the Textron site the week of August 24, 1992 to prepare an addendum when this data is acquired.

Groundwater monitoring program modification, including program upgrades when warranted, will be made as necessary to adequately document the degree and extent of contamination, and rate of contamination migration in accordance with 40 CFR 265.93. A request for one modification will be submitted in a separate submittal by the end of September 1992.

If you have any questions please do not hesitate to contact us.

Sincerely,

John Fleming, Supvr
Environmental Services
