RE: Groundwater Assessment Monitoring Modification Plan

Dear Mr. Fracasso:

Textron Lycoming herewith submits to the Connecticut Department of Environmental Protection a dynamic groundwater assessment monitoring program which reflects the current level of understanding of the contaminant plume migration from the four former surface impoundments at the Textron Lycoming/Stratford Army Engine Plant site for your consideration.

This follows the comment recommended in the Eighth Annual Summary Report that analyses for inorganic constituents not found present in the contaminant plume be discontinued and that the frequency of sampling in upgradient or "side-gradient" wells not showing contamination be reduced.

If you have any questions please do not hesitate to contact us.

Sincerely,

John Fleming, Supr.
Environmental Eng.
