RE: Addendum II, Supplementary Hydrogeologic Investigation

Dear Mr. Fracasso:

Textron Lycoming herewith submits to the Connecticut Department of Environmental Protection (CTDEP) an addendum to the Supplementary Hydrogeologic Investigation Report which was submitted in December 1991.

This report provides data acquired to respond to the CTDEP requested assessment of the geochemical properties of the peat layer and influence upon vertical contaminant transport under the four former surface impoundments at the Textron Lycoming/Stratford Army Engine Plant site.

If you have any questions please do not hesitate to contact us.

Sincerely,

John Fleming, Supt.
Environmental Eng.
