Re: Hazardous Waste Closure Plan; CT D001181502

Dear Mr. Gelting:

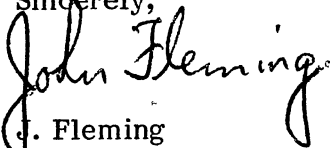

Enclosed you will find several pages which should be added to your copy of the Closure Plan which Avco Lycoming Textron submitted.

The issues, which you specified in your letter of January 9, 1986 to Mr. D. Carpenter, are:

1. A copy of the NPDES water pollution control permit, specifically permit CT D001181502.
2. Specification of the methods for testing volatiles in the soil samples which will be taken from beneath the lagoons on closure.

These issues will then be a part of the closure plan.

It is not anticipated that the closure plan will be implemented until after public notice is made if your timetable is as you indicated in your letter.

Sincerely,

J. Fleming
Chief Environmental Eng'g.
