Re: Catch Basin Modification Project

Dear Mr. Cunningham:

In response to your letter dated April 9, 1997 concerning the catch basin modification project, the Department concurs that the construction of this project should be cancelled at this time. However, AlliedSignal or any future owner/operator of the site shall retain the designs for the modified catch basins in the event that a situation may occur which warrants the implementation of these plans.

Upon completion of the scrap yard projects scheduled for May 31, 1997, the Department requests the submittal of the final report on this redesign, as well as, a report on all other engineering controls and best management practices for the review and written approval by the Commissioner.

If you have any further question on this matter, please give me a call @ (860)424-3904.

Sincerely,

A handwritten signature in black ink that reads "Christopher P. Moccia".
